Better health for all Londoners?

Purpose: to ensure grassroots community issues and solutions are at the heart of London's health inequality strategy and policy implementation

Health and Well Being is a cross-cutting issue for many of the problems Londoners face - insecure and unaffordable housing, green space deficiency, the absence of a just food system. It has specific impacts on particular community groups which need to be recognised and mutually supported. An integrated response is required.

The London Mayor has set out his proposals. The consultation period will run until 30 November 2017. See survey at:
